

# POLLINATORS & AGRICULTURE

Pollinators are essential to agriculture.  
 Los polinizadores son esenciales en agricultura.  
 Les pollinisateurs sont essentiels à l'agriculture.

Pollinator-friendly Best Management Practices promote pollinator populations and pollinator diversity in agricultural landscapes, resulting in important benefits to farmers.

## A Partnership on the Land

Encourage native and managed pollinators

Establish hedgerows, floral strips, and habitat corridors

Provide a clean water source

Practice Integrated Pest Management

Include native plants to support a diversity of pollinators

Provide nesting habitat for native pollinators
