Achieve Maximum Potential Corn Yields in the Southern U.S.

Benefits of Headline AMP® Fungicide

- Delivers the most yield at tassel
- Proven Plant Health benefits of Headline® fungicide
- Best-in-class preventative and post-infection disease control

Late Season Disease Control and Plant Health Helps Corn Maximize Photosynthesis

Southern Rust Control

Gray Leaf Spot Control

Headline AMP® is a combination of Headline® fungicide and Caramba fungicide

**Increased stalk strength with Headline AMP.**
Reduced lodging, increased standability, increased harvest efficiency.

**Labeled Crops**
- Corn (all types)

**Use Rate**
- 10 to 14.4 fl oz/A

**Application Information**
- Aerial: >/= 5 GPA; Ground: >/= 10 GPA
- PHI: 20-days for field corn; 7-days for seed and sweet corn
- REI: 12 hours

**Adjuvant**
- Adjuvant flexible: however, do not use an adjuvant between V8 and VT corn

**Target Diseases**
- Anthracnose
- Eyespot
- Gray leaf spot
- Northern corn leaf blight
- Northern corn leaf spot
- Physoderma brown spot
- Common Rust
- Southern Rust
- Southern corn leaf blight
- Yellow leaf blight

**Competitive Triazole Comparisons**

Inbred Corn, 5 weeks after application

Increased Performance

**Adjuvant Recommendations**

An adjuvant may be used with Headline AMP fungicide prior to the V8 stage and after corn reaches the VT stage.

Another fungicide or an insecticide may be included in the tank mix, if needed, and labeled for use on corn.

**Ground & Aerial Application**

**Adjuvant**

- Adjuvant flexible
- Adjuvant restricted
- Adjuvant flexible

Headline AMP® is a combination of Headline® fungicide and Caramba fungicide

**Same hybrid, same field, same day. B-H Genetics**
