Performance You Can Count On

Benefits of Extreme® Herbicide

- Residual with flexibility—pre-plant, PRE, and early post for Roundup Ready® soybeans
- Increase yield potential on every acre by controlling grasses and broadleaves
- Resistance management—two modes of action to combat resistant weeds

**Early Season Weed Competition Steals Moisture and Nutrients**

Kansas State University, 2005

Extreme combines the proven residual of Pursuit® herbicide with the burndown activity of glyphosate

Recommendations for Use on Soybeans

2009 BASF Field Trial, Iowa, 9 WAT
Best Use Recommendations

- Apply as burndown to any soybean variety
- Apply postemergence to Roundup Ready® soybeans when weeds are 1–8" tall

**Use Rate:** 3 pt./A  
**NIS Rate:** 1 pt/100 gallons  
**AMS Rate:** 8.5–17 lb/100 gallons  
**Application Information:** 10–20 GPA  
20–40 PSI, Use a drift retardant

**General Information:**
- Extreme® herbicide combines the proven residual of Pursuit® herbicide with the burndown activity of glyphosate  
- A wider postemergence application window—lets you spray when you want  
- Burndown plus residual equals increased yield
