

Liberty® LibertyLink®

Herbicide

S.T.O.P. Weeds with Liberty® Herbicide

Application Guidelines for Maximum Control

S

Start clean and stay clean

Control emerged weeds prior to planting and control escapes throughout the season.

T

Target < 3" weeds

Small weeds are easier to control.

O

Optimize coverage

Follow the correct rate, water volume of 15 GPA and use a nozzle with a medium-to-coarse-size spray droplet.*

P

Pair with residuals

Use multiple effective sites of action for pre- and post-residuals.

*Weed control with very coarse, extremely coarse or ultra-coarse nozzles will not provide adequate coverage and will cause unsatisfactory weed control.
