Best Weed Management Practices for Post Applications to Soybeans

Why Engenia™ Herbicide?
Engenia Herbicide is a new patented formulation developed specifically for use on your dicamba-tolerant soybeans.

**Provides Postemergence Broadleaf Weed Control**
- Effective on over 200 broadleaf weeds
  - Including glyphosate, triazine, ALS, and PPO-resistant broadleaf weeds
- Up to two weeks residual

**Most Advanced Formulation**
- New BAPMA salt reduces volatility risk
- Excellent crop tolerance

**Most Flexible**
- Lowest use rate = 12.8 fl oz/A
- 5 lbs ae/gal formulation
- Less product to handle
- Convenient for use with direct injection

Why Outlook® Herbicide?

**Broad-Spectrum Residual Weed Control**
- Annual grasses and small-seed broadleaf weeds
  - Including glyphosate-resistant waterhemp and Palmer amaranth
- Effective resistant weed management

**Flexible Use for Operational Efficiency**
- Wide application window – preplant, preemergence and/or postemergence
- Low use rate for easy handling

**Consistent Performance**
- Easily activates with minimal rainfall
- Readily washes off crop residue to where weeds germinate

**Effective Weed Control in Dicamba Tolerant Soybeans**
- Layer residuals both PRE and POST
- Use multiple effective sites of action
- Target weeds less than 4 inches tall
Engenia Herbicide
Best Use Recommendations

Only for Use on Dicamba-Tolerant Soybeans: Additional State Restrictions May Apply

- **Use Rate:** 12.8 fl oz/A
- **Application Timing:** Preplant, Preemerge, POST (through R1)
- **Minimum Application Volume:** 10 GPA
- **Windspeed:** DO NOT spray if wind is blowing toward neighboring specialty crops. **<3 mph:** Apply when a temperature inversion is not present, **3 to 10 mph:** Optimum application conditions provided all other application requirements are met, **>10 to 15 mph:** DO NOT apply when wind is blowing toward neighboring sensitive non-specialty crops, **>15 mph:** DO NOT apply Engenia herbicide
- **Ground Speed:** Not to exceed 15 mph
- **Border/Setback to Sensitive Areas:**
  - Maintain a 110 foot buffer when applying this product from the downwind outer edges of the field, less the distance of any of the adjacent areas specified on the label
  - Always check your surroundings for sensitive plants/crops before making an Engenia herbicide application
- **Use only approved nozzles:** TTI11004 and 11005. Visit [www.engeniatakemix.com](http://www.engeniatakemix.com) for a list of approved nozzles.
- **Boom Height:** 24 inches or less above target
- **Only use tank mixtures and adjuvants approved by EPA:** No acidifying water conditioners; DO NOT use ammonium additives (e.g., AMS, UAN)
  - Visit [www.engeniatakemix.com](http://www.engeniatakemix.com) for a list of approved tank mix partners and adjuvants

Outlook® Herbicide
Best Use Recommendations

- **Use Rates:** 8 to 21 fl oz/A
- **Application Timing:** Preplant, Preemerge, POST (to 5th trifoliate)
- **Use higher rates for high weed populations and/or longer residual activity**
- **A post herbicide tank mix partner is required to control emerged weeds**
- **Sequential applications may be made 2 weeks or more apart**
- **If sequential applications are made, DO NOT exceed 24 fl oz/A total per season**
- **An approved drift reduction agent (DRA) MUST be used if tank-mixing with Engenia herbicide. Visit [www.engeniatakemix.com](http://www.engeniatakemix.com) for a list of approved DRA products.**

*Use rate is dependent on soil type, organic matter, and the desired length of control.

Continuing Education

BASF offers training programs to support applicators. The On Target Application Academy was established to provide field-based applicator training with a practical and rigorous focus on proper application. Hands-on experience, including proper nozzle selection, calibration, boom placement, environmental considerations and the use of effective drift reduction additives, are all addressed.

To learn more about the [On Target Application Academy](http://otaa.basf.us), or to find a training event in your area, please visit [otaa.basf.us](http://otaa.basf.us)

BASF now offers the OTAA educational experience online in the form of a digital training module. Go to: [GrowSmartUniversity.com](http://GrowSmartUniversity.com)
