Flo Rite® 1197 Plantability Polymer for Wheat and Sunflowers

Keep Seed Treatments Where They Belong
- Improves adhesion of actives
- Reduces and controls dust-off
- Preserves value of seed treatments
- Compatible with major fungicides, insecticides and colorants

Improve Plantability of High-Value Genetics
- Improves flow through planter
- Increases seed drop accuracy
- Reduces stickiness, seed bridging and clumping

Increase Seed Treatment Flow and Handling
- Provides more uniform coverage of treatments
- Creates smoother seed surface and improved appearance
- Reduces stickiness, seed bridging and clumping
- Helps increase seed flow during conditioning
- Improves handling following seed treatment
- Eliminates need for talc* during seed treatment

* Growers should follow their planter manufacturer’s recommendation for seed/planter lubricant requirements (graphite or talc).

Flo Rite Plantability Polymers reduce dust-off and improve flowability

Technical Information Bulletin
Color Coat™ Colorants

- Ready-to-use liquid colorants
- Use to help identify seed by the type of actives applied or improve appearance
- Effectively color almost any seed regardless of size, shape or texture
- Compatible with all major active seed treatment ingredients
- Water-based for easy cleanup

Convenient Handling and Application

- Neutral pH and low viscosity
- Water based, easy clean up
