Headline AMP®
Fungicide

Achieve Maximum Potential Corn Yields

Benefits of Headline AMP® Fungicide
- Delivers the most yield at tassel
- Proven Plant Health benefits of Headline fungicide
- Best-in-class preventative and post-infection disease control

Late Season Disease Control and Plant Health Helps Corn Maximize the Suns Energy

Technical Information Bulletin
The Chemical Company
**Labeled Crops**
- Corn (all types)

**Use Rate**
- 10 to 14.4 fl oz/A

**Application Information**
- Aerial: >/=2 GPA; Ground: >/= 10 GPA
- PHI: 20-days for field and popcorn grain; 7-days for seed and sweet corn
- REI: 12 hours

**Adjuvant**
- Adjuvant flexible: however, do not use an adjuvant between V8 and VT corn
- Headline AMP is compatible with many foliar fertilizers. Nitamin can be included with fungicide applications at 1 gallon/A

**Target Diseases**
- Anthracnose
- Eyespot
- Gray leaf spot
- Northern corn leaf blight
- Northern corn leaf spot
- Physoderma brown spot
- Rust
- Southern corn leaf blight
- Yellow leaf blight

**Competitive Triazole Comparisons**
Inbred Corn, 5 weeks after application

Increased stalk strength with Headline AMP.
Reduced lodging, increased standability, increased harvest efficiency.

**Ground & Aerial Application**

An adjuvant may be used with Headline AMP fungicide prior to the V8 stage and after corn reaches the VT stage.

Another fungicide or an insecticide may be included in the tank mix, if needed, and labeled for use on corn.

**Adjuvant Recommendations**
