Trial conducted at South Dakota State University (2013). 4 fl oz/A of Priaxor fungicide applied midbloom to dry pea.

Enhanced Root Growth with Priaxor Fungicide

Healthier Lentils with Priaxor® Fungicide

Best Use Recommendations

- Use Rate: 4.0–8.0 fl oz/A
- White mold suppression 6.0-8.0 fl oz/A
- Ground and aerial applications
- Priaxor fungicide may be tank mixed with other products, including insecticides like Fastac™ insecticide
- Priaxor fungicide may be applied with NIS to improve coverage

Target Diseases

- Anthracnose
- Alternaria leaf spot
- Ascochyta blight
- Asian soybean rust
- Botrytis gray mold
- Cercospora leaf spot
- Downy mildew
- Mycosphaerella blight
- Powdery mildew
- Rust & white mold suppression

Priaxor Fungicide Prevents Premature Ripening by Reducing Ethylene Production Allowing for Extended Pod Fill

Timing and Application

- Apply preventatively for multiple diseases
- Include NIS for improved coverage
- Apply at flowering/pod set or before disease onset

Untreated

Priaxor Fungicide (6 fl oz/A)

2013 NDSU CREC – Carrington, ND lentil anthracnose fungicide efficacy trial. Priaxor applied three times due to heavy anthracnose pressure.
