Broadleaf Weed Control for Dry Field Pea, Lentil and Chickpea

Benefits of Sharpen® Herbicide

**Powered by Kixor® Herbicide Technology**
- Control of the toughest broadleaf weeds
- Excellent management tool for winter annuals including mustard species and prickly lettuce

**Fast and Effective**
- 3 to 5 times faster than 2,4-D or glyphosate
- Effective control of broadleaf weeds

**Flexible**
- Preplant and preemergence application timings
- Plant any crop the following spring
- Compatible with residual herbicide partners

**Prickly Lettuce Control**

Montana State University Field Trial, 2010. 7 DAT. Sharpen herbicide applied at 1 fl oz/A. Glyphosate applied at 22 fl oz/A. Prickly lettuce burndown application.

Sharpen herbicide delivers 21st century solutions to 21st century farmers.
Always read and follow label directions.

Best Use Recommendations

Dry Field Pea and Chickpea Recommendations
- Sharpen herbicide (1–2 fl oz/A) + glyphosate

Sharpen Herbicide + PPO/Group 14*
- Dry field pea: Sharpen herbicide (1 fl oz/A) + PPO/Group 14 applied preplant/preemergence
- Chickpea: Sharpen herbicide (1-2 fl oz/A) + PPO/Group 14 applied preplant/preemergence

Lentil Recommendations
- Sharpen herbicide (0.75 fl oz/A) + glyphosate
- **DO NOT** apply to Spanish Brown varieties

Application Timing**
- Preplant
- Preemergence

Application Requirements
- Adjuvant: MSO (1 gal/100 gals or minimum 1 pint/A) + AMS (8.5 to 17 lbs/100 gals)
- 15 GPA carrier volume recommended for optimum burndown performance
- Rainfast in 1 hour

*For use in Idaho, Montana, North Dakota, Oregon, South Dakota, and Washington only.
**Sharpen herbicide must be applied prior to crop emergence or severe injury will occur.
