Verdict® Herbicide for For Fall and Spring Burndown

Powered by Kixor® Herbicide Technology

- Control of the toughest broadleaf weeds
- Excellent tool for managing winter annuals including glyphosate-resistant marestail

Fast

- 3 to 5 times faster than 2,4-D ester or glyphosate

Flexible

- Broad-spectrum broadleaf weed control
- Plant any crop the following spring
- Compatible with residual herbicide partners

Verdict herbicide delivers a 21st century solution to 21st century farmers.
Best Use Recommendations

Application Requirements
- Adjuvants: MSO (1 gal/100 gals or minimum 1 pint/A) + AMS (8.5 – 17 lbs/100 gal)
- 15 GPA carrier volume for optimum coverage
- Rainfast in 1 hour
- Weeds must be actively growing; multiple nights below freezing will reduce burndown activity
- For residual control of Italian ryegrass, tank mix with Zidua® herbicide at 2 oz/A
- Do not plant cotton until at least 42 days and an accumulation of 1 inch of rainfall and/or irrigation occurring after an application of Verdict herbicide at 5 fl oz/A to avoid crop injury. Do not plant cotton for 3 months after 1 inch of rainfall following a Verdict herbicide application at 7.5 to 10 fl ozs/A.

Benefits of a Fall and Spring Burndown with Verdict Herbicide
- Manage winter annuals, including marestail when they are smaller and easier to control
- Cleaner fields in the spring can mean more timely planting and may improve crop emergence
- Remove overwintering hosts for nematodes and destructive insects

Verdict herbicide makes fall and spring burndown simple – manage your fields more effectively and help improve your ROI.
