Benefits of Zidua® Herbicide

- Longest lasting residual control—up to two weeks longer than other herbicides
- Superior Palmer Amaranth and Waterhemp control
- Use rates are as much as 10 times less than other brands
- New standard for use flexibility

Zidua herbicide provides superior residual control and use flexibility in one product.

Broadleaf Weed Control

1.5 oz Zidua PRE followed by a Zidua Herbicide 0.5 oz + Roundup WeatherMax ® 22 oz POST.
**Glyphosate Resistant Waterhemp Control - 2011 Soybean Plots**

**Best Use Recommendations**

**Soybean Use Rate:** 1.5–3.5 oz/A  
**Labeled Crops:** Corn, Soybean, Wheat  
**Application Timing:** Fall, Preplant, Preemergence and Postemergence  
- Use rate is dependent on soil texture and application timing. Please consult label for appropriate application rate in your field.  
  * Timing depends on crop

**Weeds Controlled or Suppressed:**

- **Grasses and Sedges**
  - Broadleaf signalgrass
  - Bromus spp.
  - Crabgrass spp.
  - Goosegrass
  - Foxtail spp.
  - Johnsongrass (seedling)

- **Broadleaf Weeds**
  - Carpetweed
  - Common ragweed
  - Kochia
  - Lambsquarters
  - Marestail (horseweed)
  - Morningglory spp.
  - Nightshade spp.
  - Palmer amaranth
  - Pigweed spp.
  - Prickly sida
  - Velvetleaf
  - Waterhemp
  - Wild Buckwheat

**General Information:**

- Zidua herbicide may be applied in water or in sprayable liquid nitrogen fertilizer solutions. Zidua herbicide may also be applied impregnated on dry bulk fertilizers.
- A minimum of 1/2” of rainfall or overhead irrigation is required following application and prior to weed emergence for optimal performance.

In the photo on the right, Zidua herbicide was applied at 2.5 oz/A and Sharpen herbicide was applied at 1 fl oz/A. UI Field Trial (SWHZIDUA) Central, IL. Preemergence (41 DAT). Photos taken 06-29-11.
