Clean Up Alfalfa with a Dormant Season Application of Sharpen® Herbicide

Sharpen Herbicide Benefits

**Powered by Kixor® Herbicide Technology**
- Control of the toughest broadleaf weeds such as common groundsel

**Resistance Management**
- Additional site of action to manage and/or prevent resistant broadleaf weeds, such as ALS resistant London Rocket

**Flexible**
- Broad-spectrum broadleaf weed control
- Quick burndown
- Effective dormant season herbicide application without yield loss

Power: Powered by Kixor herbicide technology, Sharpen herbicide drives burndown three to five times faster than 2, 4-D or glyphosate and offers broad-spectrum control of tough broadleaf weeds.

UCCE Trial – Groundsel and Shepherd’s Purse control in dormant alfalfa. Trial location: Tracy, CA. Treatment date: 1/6/15. Rating date: 3/6/15. All treatments include Hasten® (MSO) and Ammonium sulfate at 1.0%. Sharpen herbicide rate: 2 fl oz. Gramoxone SL herbicide rate: 32 fl oz.

Now available in convenient quart-sized packaging.
Application Timing by Regions

In Region A (red), make Sharpen® herbicide applications at least 90 days before first planned cutting or yield reductions may occur.

In Region B (orange), make Sharpen herbicide applications at least 75 days before first planned cutting or yield reductions may occur.

Best Use Recommendations

### Application Rates
- One application of 2 fl oz/A during dormancy
- Tank mix with Prowl® H2O herbicide for extended residual control of grasses and small seeded broadleaf weeds

### Application Recommendations
- Adjuvants: MSO (1% v/v or a minimum of 1 pt/A) + AMS (8.5-17 lbs/100 gals), OR MSO (1% v/v or a minimum of 1 pt/A) + UAN (1.25-2.5 gals/100 gals)
- For best results, apply by ground using a minimum of 10 GPA of water
- Rainfast 1 hour after treatment
- Do not apply through an irrigation system
- Do not use a nonionic surfactant (NIS) as a substitute for MSO
- Do not apply to alfalfa > 4 inches tall

Sharpen Herbicide Burndown
Dormant Season Alfalfa

2014 Parlier, CA – Photo taken 15 DAT. Sharpen herbicide treatment included MSO at 1.0% v/v + AMS at 8.5 lb/100 gal. Gramoxone herbicide treatment included COC at 1.0% v/v + AMS at 8.5 lb/100 gal.
