

Get the full benefits of our lineup.

Help growers harness the full benefits of our innovation from BASF by choosing multiple InVigor® canola hybrids for their farm. Here's a list of the benefits your growers unlock when they choose multiple InVigor hybrids for their farms:

- Spread out harvest with different maturities
- Help manage the risk of environmental factors at harvest with increased flexibility
- Take advantage of the genetic variability to cover the different needs on their farm
 - Patented Pod Shatter Reduction technology
 - First- and second-generation clubroot resistance profiles
 - Herbicide-tolerant system
 - Standability
- Help reduce risk of disease pressure by rotating InVigor hybrids
- Gain experience and confidence with a new hybrid while maintaining the use of their most trusted hybrids
