INVIGOR
HYBRID CANOLA
InVigor L255PC

Canola seed hybrid performance comparison.

InVigor[®] hybrid canola from BASF continues to lead yield rankings in field trials across the country. With consistently strong yield potential and exciting new traits to help improve harvestability, InVigor gives you the confidence to grow more.

InVigor L255PC

The first hybrid to combine Pod Shatter Reduction technology with clubroot resistance, InVigor L255PC offers great standability, plus trusted pod shatter and pod drop properties as found in InVigor L140P and InVigor L233P. It also delivers excellent yield protection and increased flexibility at harvest with the opportunity to straight cut your canola.

InVigor[®] L255PC	Yield	107% of the Roundup Ready [®] check in 2017 U.S. demonstration strip trials 109% of the checks (InVigor 5440 and Pioneer [®] 45H29) in 2016 WCC/RRC ¹ trials
	Traits	Patented Pod Shatter Reduction technology First-generation clubroot resistance LibertyLink [®] technology system
	Growing Zones	Long growing zones in the U.S. spring canola market
	Standability	Very strong
	Maturity	1.5 days earlier than the average of the checks
	Blackleg	R – Blackleg-resistant

Please note: Maturity and standability are based on performance ratings and data compiled from several InVigor internal trials over multiple years. Results may vary on your farm due to environmental factors and preferred management practices.

¹ Western Canadian Canola/Rapeseed Recommending Committee.

Straight Cut and Swathed Trials InVigor L255PC vs. Competitors

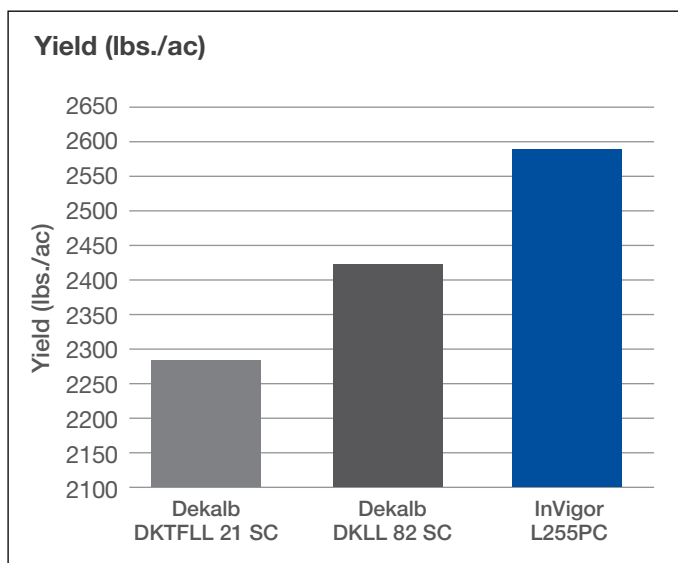

BASF conducts large plot replicated canola trials across the spring canola growing area in the U.S. These are unique trials in that they are conducted with grower cooperators and are replicated large plot trials.

InVigor L255PC out yielded Dekalb® DKTFL 21SC and Dekalb DKLL 82SC in these large plot canola trials by an average of 10% across 4 locations.

Results may vary on your farm due to environmental factors and preferred management practices.

Results November 3, 2020.

Protect your investment with outstanding weed control.

InVigor hybrids are bred with the LibertyLink trait for built-in tolerance to Liberty herbicide. This fast-acting control allows growers to rotate non-selective herbicide systems and effectively manage tough-to-control weeds.
