INVIGOR
HYBRID CANOLA
InVigor L345PC

Canola seed hybrid performance comparison.

InVigor[®] hybrid canola from BASF continues to lead yield rankings in field trials across the country. With consistently strong yield potential and exciting new traits to help improve harvestability, InVigor gives you the confidence to grow more.

InVigor L345PC

As part of the new 300 series hybrids from BASF, InVigor L345PC has demonstrated exceptionally high yield potential in both internal and external trials. It features the same game-changing patented Pod Shatter Reduction technology as InVigor L233P, InVigor L234PC and InVigor L255PC, along with first-generation clubroot resistance. With InVigor L345PC, you get excellent yield protection and the flexibility to straight cut your canola.

InVigor[®] L345PC	Yield	111.9% of the checks (InVigor 5440 and Pioneer [®] 45H29) in the 2017/2018 WCC/RRC ¹ trials 111.4% of InVigor L233P (n=28 trials, 2018)
	Traits	Patented Pod Shatter Reduction technology First-generation clubroot resistance LibertyLink [®] technology system
	Growing Zones	All growing zones in the U.S. spring canola market
	Standability	Strong
	Maturity	1 day earlier than InVigor L252
	Blackleg	R – Blackleg-resistant

Please note: Maturity and standability are based on performance ratings and data compiled from several InVigor internal trials over multiple years. Results may vary on your farm due to environmental factors and preferred management practices.

n=number of balanced trials.

¹Western Canadian Canola/Rapeseed Recommending Committee.

2020 BASF InVigor Demonstration Strip Trial Results.

BASF conducts large plot replicated canola trials across the spring canola growing area in the U.S. These are unique trials in that they are conducted with grower cooperators and are replicated large plot trials.

InVigor L345PC averaged a 12% yield advantage over Dekalb® DKTFL 21SC and an 8% yield advantage over Dekalb DKLL 82SC over 9 large plot trials conducted in North Dakota.

Results may vary on your farm due to environmental factors and preferred management practices.

Results November 3, 2020.

Protect your investment with outstanding weed control.

InVigor hybrids are bred with the LibertyLink trait for built-in tolerance to Liberty herbicide. This fast-acting control allows growers to rotate non-selective herbicide systems and effectively manage tough-to-control weeds.
