INVIGOR
HYBRID CANOLA
NEW FOR 2023
InVigor Choice LR354PC

Canola seed hybrid performance comparison.

InVigor® hybrid canola from BASF continues to lead yield rankings in field trials across the country. With consistently strong yield potential and exciting new traits to help improve harvestability, InVigor hybrid canola gives you the confidence to grow more.

InVigor Choice LR354PC

New InVigor Choice LR354PC offers growers high yield potential and great standability; with the added flexibility of harnessing both the LibertyLink® technology system and TruFlex™ canola with Roundup Ready® Technology.

| | | |
|---|----------------------|--|
| NEW choice InVigor® LR354PC | Yield | 114.3% of the checks (InVigor L255PC and Pioneer® 45H33) in 2020 & 2021 BASF internal trials 110.9% of InVigor L344PC (n=33, 2020 & 2021) 112.5% of InVigor L233P (n=33, 2020 & 2021) |
| | Traits | Patented Pod Shatter Reduction technology First-generation clubroot resistance ¹ Both the LibertyLink technology system and TruFlex™ canola with Roundup Ready® Technology |
| | Growing Zones | All mid to long growing areas in the U.S. spring canola market |
| | Standability | Strong |
| | Maturity | 5 days later than InVigor L233P |
| | Blackleg | R – Blackleg resistant |

Please note: Maturity and standability are based on performance ratings and data compiled from several InVigor internal trials over multiple years. Results may vary on your farm due to environmental factors and preferred management practices.

n=number of balanced trials.

¹ To predominant clubroot pathotypes found in Canada at the time of registration. InVigor L350PC, InVigor Choice LR354PC, InVigor L340PC, InVigor Choice LR344PC and InVigor L345PC share the same first-generation clubroot resistance profile. InVigor L343PC has this resistance profile plus it contains second-generation multigenic clubroot resistance to additional clubroot pathotypes to help combat evolving clubroot pathotypes.

Protect your investment with outstanding weed control.

InVigor hybrids are bred with the LibertyLink trait for built-in tolerance to Liberty® herbicide. This fast-acting control allows growers to rotate non-selective herbicide systems and effectively manage tough-to-control weeds.
