

## Core Blends

**BASF**  
We create chemistry

## Bringing Together Innovation and Flexibility

**Core Blends provide mixes that protect yield potential from the start with fungicide and fungicide/insecticide options.**

- Colorless / Blonde formulations
- Flexibility for differentiated value-adds and geography specific needs
- Lower use rates
- Same agronomic benefits as F4 blends

### **Stamina®**

Fungicide Seed Treatment

#### **Powerful Stress Tolerance and Disease Prevention**

- Powered by F500® fungicide which blocks fungal cells' energy supply and inhibits other vital functions
- Catalyst of Plant Health benefits: Disease control, environmental stress control and optimized growth efficiency

### **Systiva® XS**

Xemium® Brand Fungicide

#### **Long-Lasting Activity for Better Disease Control**

- Xemium® fungicide technology is the foundation of BASF Plant Health
- Exceptional translocation and systemicity provides more consistent and continuous seedling disease control
- Enters the transpiration stream and travels through the plant to ensure protection from the first development stages

To order, contact **Paul Trethewy**,  
PNW Regional Account Manager,  
Seed Treatment at **509-309-1233**  
or **paul.trethewy@basf.com**.

#### **Core Blend 1**

##### **Stamina®**

Fungicide Seed Treatment

##### **Systiva® XS**

Xemium® Brand Fungicide

##### **Relenya®**

Seed Treatment

#### **Core Blend 2**

##### **Teraxxa®**

Seed Treatment

##### **Stamina®**

Fungicide Seed Treatment

##### **Systiva® XS**

Xemium® Brand Fungicide

##### **Relenya®**

Seed Treatment

### **Relenya®**

Seed Treatment

#### **Boost Performance**

- Add to a base foundation to boost disease protection under Fusarium and Rhizoctonia pressure
- Partners with a base package to boost yield potential under varied levels of disease pressure
- Powered by Revysol® Fungicide, the first and only isopropanol-azole of its kind in the market

### **Teraxxa®**

Seed Treatment

**ONLY INCLUDED IN CORE BLEND 2**

#### **The New Standard for Wireworm Elimination**

- Rapidly eliminates wireworms on contact and reduces resident populations
- Not systemic in the plant and stays in the root zone where you need protection from wireworm feeding
- New class of insect control via Broflanilide (IRAC Group 30)

Always read and follow label directions.
