

# INVIGOR HYBRID CANOLA InVigor L330PC

- Strong standability? ✓
- Early maturity? ✓
- Blackleg resistance? ✓

New for 2026, InVigor® L330PC is an exciting early addition to the InVigor hybrid canola lineup. With strong yield potential, this hybrid is a great fit for those looking for a high-performing, earlier-maturing hybrid — or for those in northern geographies.

Coupled with our patented Pod Shatter Reduction technology, first-generation clubroot resistance and strong standability, InVigor L330PC is built to perform across all growing zones.

<b>Yield</b>	<p><b>108%</b> of the checks, BASF internal trials, 2022 &amp; 2023, n=46</p> <p><b>101.4%</b> of InVigor L340PC, BASF internal trials, 2023, n=33</p> <p><b>105.4%</b> of Pioneer® P516L, Agronomic Excellence Trials, 2024, n=28</p>	<b>Growing Zones</b>	All
		<b>Standability</b>	Strong
<b>Traits</b>	Patented Pod Shatter Reduction technology First-generation clubroot resistance <sup>1</sup>	<b>Blackleg</b>	R – Blackleg resistant

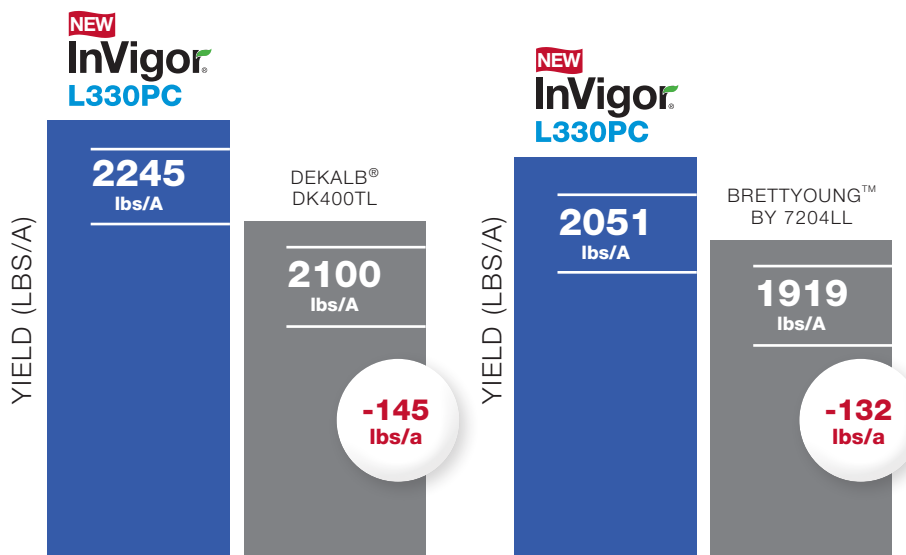

<sup>1</sup> To predominant clubroot pathotypes identified in Canada at the time of their registration. Results may vary on your farm due to environmental factors and preferred management practices.

### InVigor L330PC vs. Competitors

BASF conducts large plot replicated canola trials across the spring canola growing area in the US. These are unique trials in that they are conducted with grower cooperators and are replicated large plot trials.

InVigor L330PC averaged a **145 lbs/A** yield advantage over DEKALB® DK400TL over 10 large trials conducted in 2024.

InVigor L330PC also averaged a **132 lbs/A** yield advantage over BrettYoung BY 7204LL over nine large trials conducted in 2024.
