INVIGOR  
HYBRID CANOLA  
**InVigor L340PC**

## Canola seed hybrid performance comparison.

InVigor<sup>®</sup> hybrid canola from BASF continues to lead yield rankings in field trials across the country. With consistently strong yield potential and exciting new traits to help improve harvestability, InVigor hybrid canola gives you the confidence to grow more.

### InVigor L340PC

InVigor L340PC has it all – high yield potential, Pod Shatter Reduction, first-generation clubroot resistance<sup>1</sup> and strong standability. It is a great fit for growers who irrigate or when lodging is a concern.

<b>InVigor<sup>®</sup> L340PC</b>	<b>Yield</b>	<b>108.9%</b> of the new checks (InVigor L233P and Pioneer <sup>®</sup> 45H33), WCC/RRC <sup>2</sup> trials, 2019 <b>107.8%</b> of InVigor L233P, 2019, n=16
	<b>Traits</b>	Patented Pod Shatter Reduction technology First-generation clubroot resistance
	<b>Growing Zones</b>	All growing areas in the US spring canola market
	<b>Standability</b>	Strong
	<b>Maturity</b>	3 days later than InVigor L233P
	<b>Blackleg</b>	R – Blackleg resistant

Please note: Maturity and standability are based on performance ratings and data compiled from several InVigor internal trials over multiple years. Results may vary on your farm due to environmental factors and preferred management practices.

n=number of balanced trials.

<sup>1</sup> To predominant clubroot pathotypes found in Canada at the time of registration. InVigor L333PC, InVigor L330PC, InVigor L340PC, InVigor Choice LR344PC, InVigor L345PC, InVigor L350PC, InVigor Choice LR354PC and InVigor L355PC share the same first generation clubroot resistance profile. InVigor L343PC has this resistance profile plus it contains second-generation multigenic clubroot resistance to additional clubroot pathotypes to help combat evolving clubroot pathotypes.

## Straight cut and swathed trials InVigor L340PC vs. competitors.

BASF conducts large plot replicated canola trials across the spring canola growing area in the US. These are unique trials in that they are conducted with grower cooperators and are replicated large plot trials.

InVigor L340PC average a 187 lbs/A yield advantage over DEKALB® DKTFL 21 SC over 30 large plot trials conducted in 2021-2022.

### Yield (lbs/A)

### Lodging rating

1 = upright; 5 = flat

### Harvest rating

10 = best

Results may vary on your farm due to environmental factors and preferred management practices.

Results November 2022.

## Protect your investment with outstanding weed control.

InVigor hybrids are bred with the LibertyLink® trait for built-in tolerance to Liberty® ULTRA herbicide. This fast-acting control allows growers to rotate non-selective herbicide systems and effectively manage tough-to-control weeds.
