

Lead with Liberty[®] Herbicide in E3[®] Soybeans

Why Spray Liberty Herbicide as Your First Postemergence Application?

Faster Knockdown of Weeds

Rapid symptomology will tell you if you have control in days, not weeks.

Waterhemp Control – 12 Days After Treatment

Enlist[®] One Herbicide

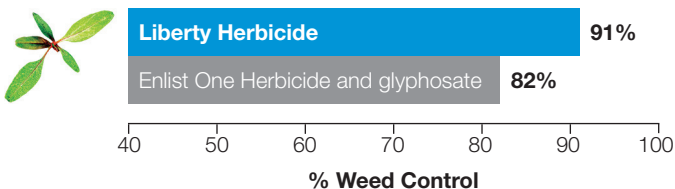

Liberty Herbicide

BASF Internal Field Trials, Seymour, IL, 2020. AIXR Nozzle, 20 GPA, 32 fl oz/A of Liberty and Enlist One herbicides.

Better Results

Waterhemp Control

Source: 2020 Joint Corteva[®]/BASF Trial NA20K1A005H. Locations (4).

More Flexibility / Convenience

Wide use rate range of 32–43 fl oz/A. Liberty herbicide also has traditional label requirements, more flexibility in tank mix partners, and fewer label restrictions on neighboring areas than Enlist One herbicide.

Excellent Broad Spectrum Weed Control

- Control your toughest weeds like pigweed, giant ragweed, giant foxtail, and kochia
- Liberty herbicide cutoff: prior to flowering, up to R1 growth stage

We've Got Your Back

Follow the Liberty herbicide label instructions and the S.T.O.P. Application Guidelines for optimal weed control.*

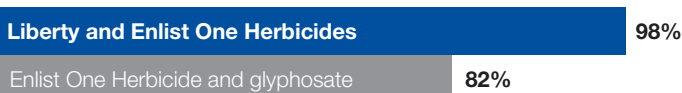

*We are confident that Liberty herbicide will meet commercially acceptable control when applied according to label instructions and when following the S.T.O.P. Application Guidelines. We guarantee commercially acceptable weed control for 30 days after the postemergence application of Liberty herbicide. Terms and conditions apply. See Weed Control Guarantee Program for full details.

Maximize Weed Control with Liberty® and Enlist One Herbicides in E3 Soybeans

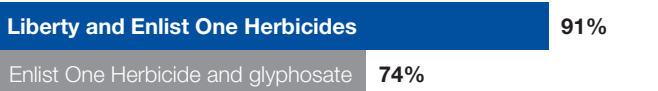

- Tank mixing Liberty and Enlist One herbicides maximizes weed control efficacy from a single postmergence application.
- Put your best foot forward in tough conditions. Spray the tank mix of Liberty and Enlist One herbicides in E3 soybeans for the best overall efficacy and to mitigate resprays, weed escapes and herbicide resistance.

The Best Tank Mix on the Toughest Weeds

Waterhemp

Palmer Amaranth
