

LibertyLink® InVigor® Canola

Flexible, Reliable Weed Resistance Management

- **InVigor** canola hybrids are known for market leading yield potential.
- **Pod Shatter Reduction Technology** to protect yield potential and added flexibility at harvest.
- **Liberty® Herbicide** provides an excellent means for growers to rotate non-selective herbicide systems to effectively manage weed resistance.
- **InVigor** canola hybrids offer a wide range of maturity options and disease protection packages to improve harvest flexibility and address other cropping concerns.

Benefits of Liberty Herbicide

- **Excellent control** of tough weeds, with broad spectrum performance on both broadleaves and grasses.
- **Patented formulation** of Liberty herbicide provides up to 15% better weed control* when compared to other glufosinate formulations.
- **Peace of Mind:** Liberty herbicide applications are backed by the Liberty Herbicide Weed Control Guarantee Program.

*Source: Internal Field Trials, 2015-2018, n=22, 87 weeds evaluated include: Waterhemp, palmer amaranth, redroot pigweed, morninglory, kochia, giant ragweed.

Technical Information Bulletin

Optimizing Liberty® Herbicide in Canola

Application Timing

- Target weeds under 3"
- Up to early bolt stage of LibertyLink® Canola

Time of Day

Spray Liberty herbicide at least two hours after sunrise or two hours before sunset

Use Rate

Recommended rate of 29 fl oz/A

Tank-Mix Partners

- 3.0 lbs of AMS
- May apply clethodim with Liberty herbicide for increased grass control

Spray Volume

20 gal/A recommended

Nozzle Selection

Select nozzles that provide medium to coarse size droplets to achieve uniform and thorough weed coverage (i.e. TTJ, XR, AIXR)

Sprayer Speed

10 mph or lower is recommended for optimal coverage. Verify with nozzle configuration.

Wind Speed

Recommend 3-10 MPH for effective coverage
