Broadleaf Weed Control in Perennial Forage Grasses

Benefits of Sharpen® Herbicide

- Powered by Kixor® Herbicide Technology
 - Control of the toughest broadleaf weeds
- Fast and Effective
 - Three to five times faster than 2,4-D
 - Effective control of broadleaf weeds
- Flexible
 - Application in cool and warm season grasses
 - Dormant season and in season use
 - Zero day grazing restriction

Best Use Recommendations

Perennial Forage Grasses (Pasture, Hay, Silage)

- Cool season perennial grasses
- Warm season perennial grasses

Application Timing

- Dormant season application: Late fall or early winter dormancy period, or in early spring prior to green-up.
- In season: Actively growing forage grasses from green-up to early heading.

For broadleaf weed control in perennial forage grasses grown in pasture, for forage, silage and hay production.
