

Target spot in cotton: inspect and protect against devastation

Priaxor®
Xemium® Brand Fungicide

Priaxor Xemium Brand Fungicide is the solution to protect yields against severe defoliation.

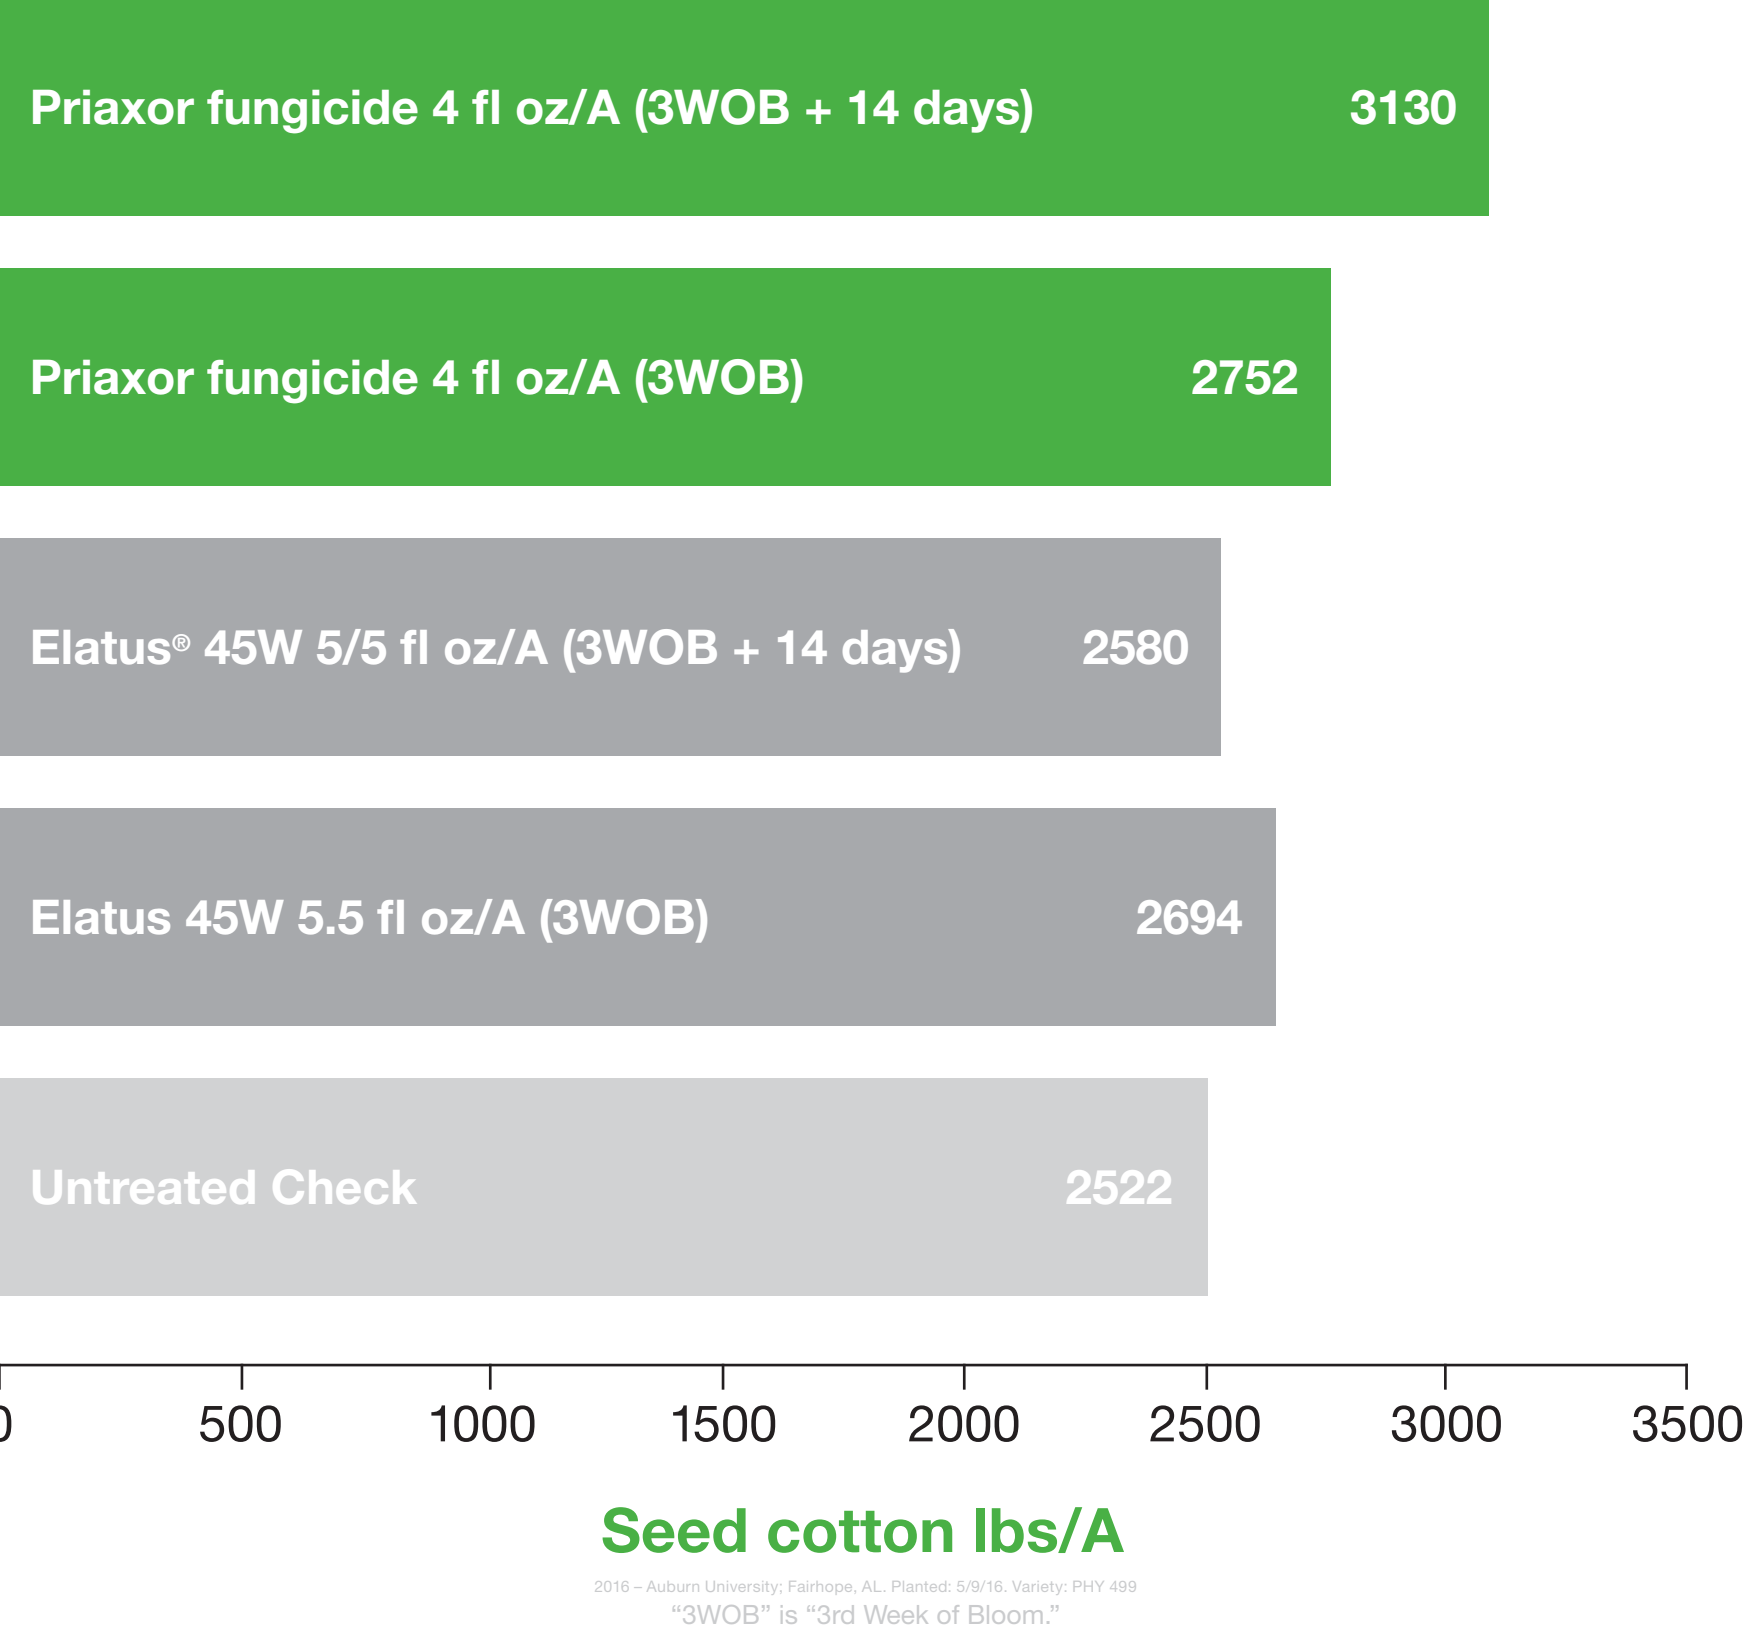

Benefits of Priaxor fungicide

- Best-in-class target spot control
- Provides Plant Health benefits in cotton
- Helps improve yield and minimizes risk
- Two effective modes of action for resistance management

If any of these factors below are present on your farm, application of Priaxor fungicide may be beneficial

- Have you or your neighbors had a problem within the past several years with disease on your cotton leaves? (Symptoms include leaf spots and premature defoliation.)
- Are you planting cotton behind cotton? Or on a short rotation?
- Is the weather favorable for disease development?
- Are afternoon showers in the forecast? Is a tropical storm forecast to impact the area?
- Do you irrigate your cotton?
- Do you manage your cotton for high yields?
- Is your cotton a full-season variety?
