

# Residual Weed Control in Rice

## Benefits of Residual Weed Control

- Controls weeds before they emerge
- Reduces weed competition for cleaner crop and higher yields
- Provides economical weed control

## Prowl® H20

Herbicide

- Delayed Pre or Early Postemergence
- Excellent residual control
- Reduced weed competition
- Controls glyphosate, ALS, and atrazine resistant weeds

## Sharpen®

Powered by **Kixor®** Herbicide

- Burndown and Preemergence weed control
- Excellent residual control at 2–3 fl ozs/A
- Reduced broadleaf and ALS resistant sedge competition

## Facet® L

Herbicide

- Pre and Postemergence weed control
- Residual control with early applications
- Reduced broadleaf and grass competition

## Newpath®

Herbicide for **Clearfield®** Rice

- Pre and Early Postemergence weed control
- Red rice control
- Residual weed control

## Clearpath®

Herbicide for **Clearfield®** Rice

- Pre and Early Postemergence weed control
- Broad spectrum weed activity
- Red rice, hemp sesbania and more
- Residual weed control

**If you're a rice grower who expects more, trust BASF to deliver an entire portfolio of solutions to fit your rice production needs.**

## Best Use Recommendations for Residual Weed Control in Rice

Herbicide	Active	Rate	Method of Application	Target Weeds
Sharpen® Herbicide	Saflufenacil	2–3 fl ozs/A	Preplant or Preemergence	Burndown and residual control of broadleaf weeds including Palmer amaranth, pigweed, morningglory and Texasweed
Prowl® H2O Herbicide	Pendimethalin	2 pt/A	Delayed PRE or Early Postemergence	Residual weed control including barnyardgrass, junglerice, sprangletop, broadleaf signalgrass and pigweed
Clearpath® Herbicide*	Imazethapyr + Quinclorac	0.5 to 0.72 lb/A	Early Postemergence prior to 5-leaf rice stage (dry-seeded)	Residual control of grasses including red rice, barnyardgrass, broadleaf signalgrass and hemp sesbania. Also Postemergence control of red rice and other weeds.
Newpath® Herbicide*	Imazethapyr	4 to 6 fl ozs/A	Preemergence or Early Postemergence prior to 5-leaf rice stage	Postemergence and residual control of red rice, barnyardgrass and other weeds
Facet® L Herbicide	Quinclorac	22 to 43 fl ozs/A	Soil applied to Mid-Postemergence rice stage	Burndown and residual control of barnyardgrass, broadleaf signalgrass, hemp sesbania and other weeds

\*For use only on Clearfield rice varieties and hybrids.

Please see product container label for complete application information, crop rotation restrictions, and complete list of weeds controlled. Always read and follow label directions.

**Reduce weed competition for cleaner crop and higher yield by controlling weeds before they emerge.**
