

Maximizing Potential on Soybean

Field Notes

2026 Grower Finance Program*

Lock in your purchases early for all BASF participating brands (including rice and cotton seed), plus your fungicide application¹ to secure our best low-interest offer.

- Minimum initial purchase: \$10,000
- Crop Protection Brands: **Fixed 4.99% APR** if financed beginning March 16, 2026 through September 30, 2026
 - FiberMax[®] and Stoneville[®] cotton seed: **Fixed 1.99% APR** beginning March 16, 2026 through September 30, 2026
- Payment terms: November 2026 (extended terms to January 2027 at grower paid additional rate)

Always read and follow label directions. Engenia[®] herbicide is a U.S. EPA Restricted Use Pesticide. Every application of Engenia herbicide requires the use of a Volatility Reduction Agent (VRA) (visit www.engeniaherbicide.com/VRA for a list of approved VRAs and required rates) and the use of an oil emulsion Drift Reducing Agent (DRA) at a rate of 0.3% v/v.

*Terms and conditions apply. For full details, see Finance Program and Terms and Conditions on reverse side. 1: Subject to credit approval, terms and conditions. Contact John Deere Financial[®] or Rabo AgriFinance[®] for a full list of Participating Brands and participating locations.

Revylok®

Fungicide

- Fast uptake, rainfastness, and season long residual activity
- Proven preventive and curative benefits
- Designed to perform in high disease pressure environments
- Excellent control of Cercospora leaf blight, Frogeye leaf spot and Aerial web blight

Liberty® ULTRA

Herbicide – Powered by **Glu-L™** Technology

- Better Weed Control than Generics - New Liberty® Lock Formulation locks 3x more herbicide into pigweed vs generic glufosinate²
- Exclusively Stronger – BASF exclusive supplemental label allows higher maximum use rates than generics
- Backed by BASF: BASF's industry leading R&D investment is how innovations like Liberty ULTRA herbicide are discovered

Other BASF Soybean Solutions to Consider:

ILEVO®
Seed Treatment

Priaxor®
Xemium® Brand Fungicide

Revytek®
Fungicide

 **Zidua® SC**
Herbicide

- Up to two weeks longer residual weed control than other herbicides
- Low use rate: As little as 1/20 the use rate of other residual herbicides
- Long soil stability to ensure performance and confidence
- Can be applied PRE or POST

Engenia®

Herbicide

- Packed with the most power per ounce³ for knockdown of tough and resistant broadleaf weeds including Palmer amaranth, waterhemp, kochia, morningglory and ragweed
- Straightforward application conversion of 1 gallon per 10 acres is designed to fit the way farmers work, for efficient planning and application
- Access to technical and stewardship resources that help you make every application count

Outlook®

Herbicide

- Broad-spectrum residual weed control of small-seeded broadleaf weeds including glyphosate-resistant waterhemp and Palmer amaranth
- Easily activates with minimal rainfall
- Readily washes off crop residue to where weeds germinate
