

Priaxor®

Xemium® Brand Fungicide

Grow Smart™
with BASF

Broad-spectrum disease control in soybeans

Recommendations for Managing Strobilurin Resistant Frogeye Leaf Spot (SR-FLS)

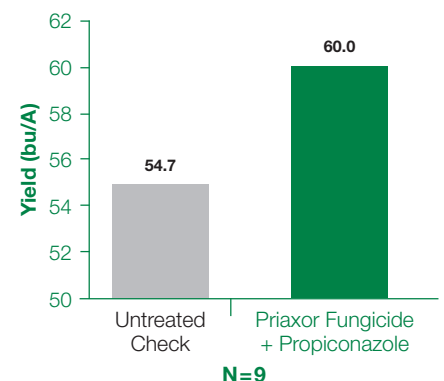

- Plant certified soybean seed with high level of frogeye leaf spot (FLS) resistance
- Use multiple fungicide modes of action at each application
- Use recommended/labeled fungicide rates
- Ensure optimum fungicide coverage
- For intensively managed acres consider a sequential program with fungicide applications at R2-R3 followed by R4-R5
- Use **Priaxor® fungicide at 4 fl oz/A + Propiconazole at labeled rate**

Frogeye Leaf Spot Lesions on Soybean Leaf

Broad Spectrum Disease Control and Advanced Plant Health Benefits of Increased Root Growth and Photosynthesis

Increased Yield with Priaxor Fungicide plus Propiconazole

2014-2015 small plot replicated trials. 9 locations: AR (2), KY(1), MS(1), NC(1), TN (4). Data for both susceptible and resistant varieties. All trials were externally run with independent universities. Priaxor fungicide 4 fl oz/A + Propiconazole 4 fl oz/A.

Always read and follow label directions.
