

Clearpath®

Herbicide for **Clearfield®** Rice

Broad Spectrum Weed Control in Rice with Clearpath® Herbicide

Benefits of Clearpath® Herbicide*

- Pre and Early Postemergence weed control
- Broad spectrum weed activity
- Barnyardgrass, hemp sesbania and more
- Residual weed control

Best Use Recommendations

- **Use Rate:** 0.5-0.72 lb/A
- **Active Ingredient:** Imazethapyr + Quinclorac
- **Method of Application:** Pre and Early Postemergence prior to 5-leaf rice stage (dry-seeded)

Target Weeds

- Residual control of grasses including barnyardgrass, broadleaf signalgrass and hemp sesbania. Also Postemergence control of and other weeds.

*For use only on Clearfield® rice varieties and hybrids.

Please see product container label for complete application information, crop rotation restrictions, and complete list of weeds controlled.

Incorporate Clearpath herbicide into your Clearfield Production System this year, and clear your mind and your fields of barnyardgrass and other weed worries.

Always read and follow label directions.
