

# Newpath®

Herbicide for **Clearfield®** Rice

## Control the Toughest Weeds in Rice with Newpath® Herbicide

### Benefits of Newpath® Herbicide\*

- Pre and Early Postemergence weed control
- Residual weed control

### Best Use Recommendations

- **Use Rate:** 4-6 fl oz/A
- **Active Ingredient:** Imazethapyr
- **Method of Application:** Pre and Early Postemergence prior to 5-leaf rice stage

#### Target Weeds

- Postemergence and residual control of barnyardgrass and other weeds

\*For use only on Clearfield® rice varieties and hybrids.

Please see product container label for complete application information, crop rotation restrictions, and complete list of weeds controlled.

 **Incorporate Newpath herbicide into your Clearfield Production System this year, and clear your mind and your fields of barnyardgrass and other weed worries.**

**Always read and follow label directions.**
